

UNIVERSITY GENERAL HOSPITAL
Where Five-Star Luxury Meets Clinical ExcellenceSM

At University General Hospital, we understand that your health is your most valuable asset, and your well-being is of utmost importance. As such, we are proud to deliver the ultimate in modern medical treatment and unparalleled attention to patient care, all set in a beautiful, healing environment.

We believe that you, as a patient and a guest, will appreciate the world-class facilities, doctors and care that University General Hospital has to offer.

The five star experience is now within reach of everyone. We look forward to serving all of your healthcare needs.

PHYSICIAN DESIGNED. PATIENT CENTERED.

University General Hospital has brought together nationally recognized physicians and specialists known for their outstanding achievements and innovative treatments. When you select a physician from our medical staff, you can be assured that you have selected a physician with an excellent reputation and a level of care that is unsurpassed.

Our 72-bed hospital has a full array of services including inpatient and outpatient medical treatments and surgeries, six state-of-the-art operating suites, two cardiac catheterization labs, endoscopy suite, pulmonary medicine, sleep center suites, diagnostic imaging, laboratory, as well as other ancillary services.

UNPARALLELED PATIENT AMENITIES

Our accomplished and experienced staff is dedicated to the comfort and well-being of each and every patient while creating a soothing and restful environment that accelerates the healing process. Unparalleled amenities pamper patients and families within an inviting environment that encourages relaxation and healing.

- Concierge Services to assist you with travel and local arrangements
- Five-star décor and spacious rooms
- Made-to-order meals and room service
- Flat panel televisions with 40 cable stations
- Complimentary wireless Internet access
- Free valet parking

INNOVATIVE PATIENT CARE

Unsurpassed patient care and safety are at the core of everything we do. We utilize the latest technology and modern medical treatment protocols to meet the exacting standards of today's rapidly changing healthcare environment.

- All medications are dispensed through the Pyxis System®, which enables real-time verification of individual patient allergies and potential medication interactions.
- Patient IV pumps are fully integrated into the hospital's internal communication system the Guardrail System (r) protects our patients by setting and monitoring all safety parameters, including schedule and dosages of medicine for each patient
- All operating rooms are uniquely designed for quick turn-around between surgical cases.
- State-of-the-art operating suites allow seamless communication between doctors, their assistants, nurses and key personnel throughout the continuum of care.
- Digital radiological equipment provides physicians with immediate access to diagnostic results. High-resolution scans are digitally generated and stored for future review, enabling instant access.
- High-definition cameras and monitors in operating rooms provide never-before-possible detail and clarity to the surgeon.
- For the convenience of our patients and when appropriate, portable digital x-ray machines are brought to the bedside rather than transporting the patient through the hospital.
